US. NO. 23779 DATE : 29/11/2024

NAME : MR. MAHESHA C, 51 YRS
REF. BY : DR. MITHUN
HISTORY : PERIANAL PAIN AND SWELLING

REPORT: (ENDOANAL AND PERINEAL ULTRASONOGRAPHY)

There is an abscess/broad fistula measuring 35 x 10 x 15 mms (3cc) in right anterior perianal region.

This enters the external sphincter through the lower bundle at 10-11 o'clock position and courses cranially and medially within the external sphincter bundle.

Internal opening is at 12 o'clock position through the mid part of sphincter about 14 mms deep to anal verge.

Anal canal is normal in length and diameter.
Internal and external sphincters of anal canal appear intact and normal.

No evidence of deep collection in the para rectal region.

DR.B.V.GIRISH, DMRD, DNB (Bombay), AFSA (France)
